vsHome Overview - All Customers

All Customers

The All Customers area displays all the customers stored in vsHome. You can create new contracts as well as import and export existing contracts.

1. **Customer Table** – This displays all the customer entries in vsHome.
2. **Selected Customer** – This shows all the details of the customer selected within the table. You have the option to view a summary of the customer, view the edit history, duplicate the customer or add notes.
3. **Filter** – The filter allows you to select which sub-group of customers you want to display in the customer table. You can also use the search function to display only those customers which match the search text.
4. **Main Actions** – The 5 buttons here allow you to:
    (1) Open a currently selected customer
    (2) Create a completely new customer
    (3) Delete the currently selected customer
    (4) Export an existing customer contract
    (5) Import a customer contract.
