vsHome Overview - Introduction & Main Menu

vsHome Main Menu

The basic screen layout for vsHome allows you to step through the main processes of product creation by using the Main Menu bar positioned along the left hand side of the screen;

All Customers
This screen displays all customers stored in vshome. You can create new contracts as well as import and export existing contracts.

Customer
The Customer screen displays all the details for the currently selected customer. Fill in customer details, installation address and order details.

Survey
This Survey screen can be used to add surveyor details and extra costs onto to the current contract.

Products
Create new products and import products into the current contract. You can also share the product to the vsHome AR app from here.

Visualisation
This screen features the Visualisation Tool which can be used to attach the model onto a backdrop image of the clients home.

Finance
The finance screen shows a breakdown of the price for the customer including discounts, payment schedules and finance provider options.

Reports
The Reports screen is used to created sales and survey reports. You can view them in vsHome or email, print and export to your PDF viewer.

The Top Toolbar

There are a number of icons along the top toolbar of the vsHome screen;

	Touchscreen Keyboard: Activate or deactivate onscreen keyboard
	Preferences: Contains the default settings used by every project in vsHome, settings such as which materials are available to use and what discounts are available.
	Current Job Settings: Contains any settings which will only affect the current contract. If you are not in a contract the Current Job Settings button will be inactive.
	Help: Contains help documents for vsHome outlining the main features. For more detailed 'How to' documents please visit our Support Portal.
